**The recovery of war-affected  
children is our responsibility**

# About us

**Kids of Ukraine** is a charitable foundation established to support families affected by the war.

The foundation's program "SviTy" is aimed at providing comprehensive assistance, psychological recovery, and organizing high-quality extracurricular education.

# Our Goal

Restoration of psychological health, adaptation, assistance in integration, and guidance in choosing future education for adolescents.

# Issues and Challenges

## Trauma and Stress

Experienced events and anxiety lead to emotional exhaustion, depression, and even suicidal thoughts.

## Socialization problems

The loss of a familiar environment leads to feelings of loneliness and complicates the adaptation process.

## Lack of Stability

The war has taken away the sense of stability. Many teenagers are uncertain about staying in the country and choosing a university.

## Lack of quality extracurricular activities

Limited opportunities for comprehensive development hinder the realization of potential.
